4 – July 2024 Preliminary Serious Incident Reports (28 Reports)

Construction (6 Reports) – Three 'struck by' incidents involving lancets in a garbage disposal when maintenance reached in during repairs, a manway blind that fell on their foot while moving it, and a trip block that fell when the wire holding the cable snapped. One 'caught between' occurred involving fingers caught in a trailer hitch while hooking up a utility trailer. One 'fall' occurred when worker fell off a skid steer. One 'other' incident occurred when worker was heading home after work and suffered heat exhaustion symptoms.

General Industry (22 Reports) — Six 'struck by' incidents occurred when the end of a tool joint broke off causing it to swing during winching operations, a loaded forklift driving forward with an obstructed view, a side-by-side utility vehicle that struck a tanker trailer, a machine cell that was turned on when they were inside striking them causing them to fall and hit their head, a piston puller that fell over when it was caught by rigging chains being relocated, and 4'x6' piece of lumber being pulled from a shelf which fell. Six 'other' incidents occurred including three heat related illnesses, a forklift operator possible exposed to carbon monoxide in a warehouse with doors closed to keep the area cool, a bucket of caustic that spilled when they were carrying it and their pants leg caught on connector valve, and a back strain while lifting a printer. Five 'caught between' involving a log cutting/moving machine that moved when the electrician troubleshooting a valve and inserted an electric plug back into the valve, hoisting slings while moving a 15' long paper roll with a crane, a crane hook and storage hook while putting it away, a compactor blade on sanitation truck when they reached in to push falling contents back into the hopper, and a motor pully while attaching a blower to a mower. Four 'falls' including a trip and fall over a plastic strap on the floor, off a platform ladder while tightening a bolt and wrench slipped, a 3' fall while retrieving items from a second level without using a step ladder, and an 8' fall off a ladder while attempting to cut a tree branch. One 'electrical' shock while repairing a junction box cover and they pushed the wires back inside.

This information has been developed by an OSHA Compliance Assistance Specialist and is intended to assist employers, workers, and others improve workplace health and safety. While we attempt to thoroughly address specific topics [or hazards], it is not possible to include discussion of everything necessary to ensure a healthy and safe working environment in this presentation. This information is a tool for addressing workplace hazards, and is not an exhaustive statement of an employer's legal obligations, which are defined by statute, regulations, and standards. This document does not have the force and effect of law and is not meant to bind the public in any way. This document is intended only to provide clarity to the public regarding existing requirements under the law or agency policies. It does not create (or diminish) legal obligations under the Occupational Safety and Health Act. Finally, OSHA may modify rules and related interpretations in light of new technology, information, or circumstances; to keep apprised of such developments, or to review information on a wide range of occupational safety and health topics, you can visit OSHA's website at www.osha.gov. Incident information is based on first reports so information may change and is edited for length. *Every incident may not be included. For questions contact Jim Shelton at Shelton.james@dol.gov
